DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 8 and 23-34 have been considered but are moot in view of the new ground of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4, 8 and 23-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Shaheen et al. (Shaheen), US Pub. No. 2005/0048969.

Regarding claims 1-4, 8 and 23-34, Shaheen discloses in a data communication system including a wireless subsystem for the transmission of data packets between a server and a wireless handset having a voice/data capability selectable between first and second operating modes, a method of selecting the operating mode of the handset after wireless communication is established between the handset and the subsystem, which comprises the steps of:

associating, with the system, a data base containing data indicative of the operating mode capability of the subsystem; transmitting query messages on the system from the handset to the data base to retrieve such capability data; and transmitting query messages on the wireless subsystem from the handset to the database to retrieve the capability data; and operating the handset in the second mode if the retrieved capability data indicates that the subsystem is capable of operation in the second mode (pages 1-2 [0003] & [0020-0026] pages 3-4 [0039] and pages 4-5 [0047-0056] and see Fig. 2).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Seazholtz et al. , US Patent No. 6,246,875, discloses a use of cellular digital packet data.
